The top diagram illustrates the 5V regulator circuit. It features a 5V Reg (AP6325) with its input connected to VCC (5V) through a 10µF capacitor (C30). The regulator's output is connected to +5V through a 100nF capacitor (C31) and a 22µF capacitor (C32). The +5V line is connected to the PMU_P1/J15 header. The bottom diagram illustrates the 3V3 regulator circuit. It features a 3V3 Reg (AP6330) with its input connected to VCC (5V) through a 10µF capacitor (C36). The regulator's output is connected to +3.3V through a 100nF capacitor (C37) and a 22µF capacitor (C38). The +3.3V line is connected to the PMU_P1/J15 header.
